International Trade Fair for Safety
Technology and Applications

7 – 9.5.2026

National Exhibition and Convention
Center (NECC), Shanghai, China

Comprehensive applications powering connected safety

www.intersecshanghai.com

Organisers

In conjunction with

The rapid evolution of the digital era is reshaping global safety demands, driving the deep integration of public safety, operational safety, physical safety and cybersecurity into a comprehensive safety industry. Powerful policy initiatives, cross-sector innovation, and rapidly expanding application scenarios are fuelling the growth of a trillion-pound market. Intersec Shanghai aims to bridge industry boundaries by building a professional exhibition platform that combines technology demonstration, scenario-based implementation, ecosystem collaboration, and trend forecasting. Rooted in the Chinese market with localised operations, the event will uphold its “technology-driven safety” philosophy in 2026, enhanced by the Chinese concept of “scenario-led application,” shaping a unique positioning of **“Internationally Leading Technology + Comprehensive Safety Scenarios.”**

In 2026, Intersec Shanghai will run alongside the EDRR exhibition, spanning 60,000 sqm and featuring six themed areas: **Public Premises, Workplace Premises, Building Premises, Energy, Environment, Telecommunication, IT & Network.** Together, these sectors will present full-chain safety solutions covering intelligent sensing, monitoring and early warning, emergency response, and risk management, empowering governments, enterprises, and organisations to address complex security challenges and move towards a smarter, safer, and more resilient future.

Exhibition highlights

International expansion platform

Backed by Messe Frankfurt’s global resource network and the international editions of the Intersec series, exhibitors gain direct access to diverse buyers, market insights, and overseas distribution opportunities to build worldwide brand presence.

Premier forum line-up

The “Safety Industry Ecosystem Cooperation Summit” and over 50 forums with policymakers, academics, and industry leaders offer in-depth, forward-looking insights.

Precision matchmaking engine

Pre-screened buyer requirements enable targeted one-on-one meetings, streamlining intent alignment and partnership formation.

Innovation awards programme

The “a&s Top Digital Products & Solutions Awards” honour outstanding products and solutions, with winners showcased through multi-channel promotions.

Integrated media package

Comprehensive marketing support for exhibitors includes press releases, interviews, and product launches to maximise visibility.

Immersive experience zone

Live demonstration areas present cutting-edge technologies in realistic settings, bringing innovation to life.

Global trade fairs and events

Focusing on the safety industry chain.

Exhibitors' feedback

“ At Intersec Shanghai, we showcased our full range of innovative products and technologies under the theme ‘intelligence, smart control, and smart connectivity,’ highlighting five key applications: smart buildings, airports, manufacturing, finance, and homes. Our Qolsys IQ smart home control panel made its China debut and won the a&s top digital products & solutions awards. The exhibition offered an excellent international platform to engage with professional visitors and clients seeking tailored solutions. ”

Mr Zhang Ning, General Manager, Tyco Safety Products (Shanghai) Co Ltd

“ We focus on high-end energy equipment and industrial services, with products covering wind power, photovoltaics, solar thermal, hydrogen energy, energy storage, nuclear power, and hydropower. Intersec Shanghai was an excellent platform to launch our Chuanrun disaster prevention and emergency storage products globally, and the results were very good. The first edition of exhibition with onsite results exceeded our expectations, and we were very satisfied with both the number of visitors and their level of expertise. ”

Mr Hong QiHua, Business Unit, Sichuan Crun Hydraulic & Lubrication Equipment Co Ltd

“ We are committed to develop a range of fire protection and firefighting technology products. We are very grateful to have Intersec Shanghai exhibition platform for allowing more people to learn about Hainar's products. The customers at the exhibition were very targeted, and the results were very rewarding, such as emergency firefighting service agents from Shanghai, Anhui, Shandong and other regions. The onsite effect exceeded our expectations by a significant margin. ”

Ms Chen YuQin, President, Sichuan Hainer Group

“ From intelligent factories in industrial production, banking systems in the financial sector, public infrastructure in city operations, to residential communities that affect people's livelihoods, security protection is an indispensable foundation. Intersec Shanghai, with its global perspective and professional platform, enabled us to engage in in-depth exchanges with industry decision-makers, not only gaining insights into market trends but also driving the exploration of innovative solutions, providing more possibilities for the rapidly changing industry demands. ”

Mr Lothar Sysk, Chief Representative of the Shanghai Representative Office, VdS Schadenverhuetung GmbH

Expect to meet high calibre trade visitors

Category	Industry / Sector	Job function
Government & public sector	Emergency management, police, fire services, transport, environmental protection, health commission, housing authorities	Director-general / department head / division chief, technical experts, procurement directors
Enterprise users	Energy, chemicals, manufacturing, finance, transport, construction, real estate, logistics	CEO, CIO, CTO, security director, operations director, procurement manager, engineers
System integrators	Security, ICT, smart building, smart city	Founders, sales directors, technical directors, product managers, solutions architects
Academic & research institutions	Universities, research institutes, industry associations, design academies	Professors, researchers, analysts

Visitors' business area

Visitors' testimonials

“ My primary interests at the fair were security cameras, solar panels, and batteries. With global demand for security solutions, China stands out as a leading destination for bulk purchases thanks to its competitive pricing and reliable quality. The fair provided a great platform to connect with trusted suppliers and identify potential avenues for large-scale markets. I discovered new companies and look forward to returning again to expand our network. ”

Mr Muhammad Faisal Aslam, Aslam and Sons Traders, Pakistan

“ Chinese manufacturers are at the forefront of security innovation, offering integrated solutions that seamlessly combine access control, video analytics, and AI to tackle complex industry challenges. Intersec Shanghai connected us with top-tier suppliers and cutting-edge products tailored to modern technological demands. China's expertise in video surveillance is truly remarkable, and I highly recommend this fair for fostering meaningful collaborations and building strategic connections. ”

Mr Mircea Ciordas, President, ARTS, Romania

“ I found the fair to be highly insightful. I had the opportunity to explore specialised products such as first aid kits and VR training solutions for firefighters, and I was impressed by the breadth of innovation on display. It is an excellent hub for discovering niche technologies and connecting with suppliers who cater to specific industry needs. Overall, it has been a rewarding experience that surpassed my expectations. ”

Ms Michaela Cabusas, Sourcing Manager, SCT Global Sourcing Co Ltd, the Philippines

Exhibition Scope

- Public premises**

Showcases key technologies and solutions for urban public safety and emergency, safeguarding lives, property, and social stability.

- Workplace premises**

Focuses on safety risk prevention and emergency response in factories and industrial parks to ensure safe and efficient operations.

- Building premises**

Provides technical solutions to enhance structural safety and protect personnel across design, construction, operation, and maintenance.

- Energy**

Highlights safety innovations in oil, electricity, renewable energy, and mining, addressing key risks in production, transmission, and storage.

- Environment**

Features technologies that support ecological protection and environmental sustainability, safeguarding natural ecosystems and human habitats.

- Telecommunication, IT & network**

Presents solutions to secure digital infrastructure, networks, and data assets for the growing cybersecurity demands.

Product categories

Public premises

- Intelligent monitoring system
- Police equipment and apparatus
- Smart policing system
- Intelligent security inspection equipment
- Firefighting equipment and apparatus
- Intelligent fire protection system
- Community security system
- Intelligent transportation system
- Food safety system
- Unmanned systems
- Services and amenities

Workplace premises

- Industrial equipment safety monitoring system
- Environmental safety monitoring equipment
- Explosion-proof equipment
- Work behavior safety control equipment
- Work safety management platform
- Intelligent fire protection system
- Protective equipment for working at heights
- Personal protective equipment
- Safety equipment for the storage and transportation of hazardous chemicals
- Services and amenities

Building premises

- Structural safety monitoring for buildings
- Safety operation and maintenance of construction equipment
- Personnel and space security management
- Intelligent fire protection system
- Construction safety protection equipment
- Smart construction site safety Management platform
- Services and amenities

Energy

- Oil and gas pipeline safety monitoring system
- Power equipment safety monitoring devices
- New energy power plant security protection plan
- Energy storage safety management system
- Mine safety monitoring equipment
- Mining operations protective equipment
- Unmanned systems
- Services and amenities

Environment

- Environmental online monitoring equipment
- Biodiversity monitoring equipment
- Nuclear radiation monitoring equipment
- Ecological remote sensing equipment
- Data modeling and analytics products
- Laboratory precision analytical instruments
- Unmanned systems
- Services and amenities

Telecommunication, IT & network

- Firewall equipment
- Intrusion detection and prevention system (IDS/IPS)
- Data encryption technology products
- Cybersecurity situation awareness platform
- Industrial internet security solutions
- Mobile endpoint security management system
- Cloud security services

Why exhibit?

- **Secure market leadership**

Target high-growth application sectors and engage directly with key decision-makers from government bodies, state-owned enterprises, and leading corporations.

- **Define industry standards**

Launch new products and showcase advanced technologies on a premier platform, contributing to white papers to build leadership and brand authority.

- **Connect across ecosystems**

Develop face-to-face relationships with supply chain leaders, system integrators, distributors, and research institutions to close the gap between technology and implementation.

- **Gain strategic insights**

Join leadership summits to stay ahead of policy developments and technological advances, informing your next phase of strategic planning.

- **Maximise brand exposure**

Leverage the organiser's global media network, through over 100 influential international and domestic media outlets.

Driving integrated safety and emergency management

EDRR will take place concurrently with Intersec Shanghai, focusing on the development of government emergency management systems as well as disaster prevention, mitigation, and relief. The event aims to promote integrated and coordinated emergency management across the Yangtze River Delta. By staging both exhibitions together, the synergistic platform is expected to draw a larger and more specialised audience, creating broader cross-departmental procurement opportunities and deepening collaboration across the safety and disaster risk reduction sectors.

Fringe programme

Aligned with the fair's vision of "International Leading Technologies + Comprehensive Safety Scenarios", a diverse range of concurrent events will foster forward looking dialogue, enable targeted business matchmaking, and enhance the practical value of safety applications.

Safety Industry Ecosystem Cooperation Summit

Professional awards: a&s Top digital products & solutions

Scenario-led interactive experience

Professional forums and seminars: covering comprehensive safety scenarios

- Public premises
- Workplace premises
- Building premises
- Energy
- Environment
- Telecommunication, IT & network
